

Dr. Monica Tocchi, Founder and Chief Medical officer at Meditrial, has over 25 years of experience and is a recognized thought leader in cardiovascular medicine.

With deep expertise in the design and evaluation of surgical and transcatheter medical devices, Dr. Tocchi has helped hundreds of small and large companies to innovate sophisticated medical technologies and implant procedures, and to navigate the complex regulatory environment that governs clinical research.

Dr. Tocchi is a cardiologist with a PhD in cardiovascular pathophysiology.

She is a contributor to international regulation, involved in the development of standards on clinical trials (ISO 14155), cardiac valve replacement and repair (ISO 5840; ISO 5910), cardiac occluders (ISO 22679)
